Subject: Recommendation for Adarsh Vikas Sriram
To Whom It May Concern

It has been a pleasure working with Adarsh Vikas Sriram, a Grade 12 student at CHIREC International School, on a collaborative AI project at **AI Ready School**.

Over approximately four active months, Adarsh developed an AI-based solution to convert PDF and Word documents into video content. In between, he took a four-month break due to examinations and medical reasons, after which he returned with the same enthusiasm and successfully completed the project.

What impressed me most was Adarsh's willingness to explore problems without always having a clearly defined path forward. He worked with HTML and CSS for interface development, GitHub for code management and version control, and Vercel for deployment. When he encountered unfamiliar challenges, he researched independently, experimented with different approaches, debugged issues, and actively sought our feedback.

Adarsh was also genuinely collaborative. He communicated his progress openly, listened carefully to suggestions, and took ownership of moving the project forward. His curiosity and persistence were evident throughout our interactions.

The completed solution has practical value for AI Ready School, and we plan to use this project in production shortly. I have enjoyed seeing Adarsh grow through this experience and am confident that his curiosity, initiative, and technical mindset will serve him well in his future studies.
